Hello, Please do not take away our choices for news and entertainment by allowing a few groups to dictate to us what we can listen to. The airwaves should belong to ALL the people. But it seems the taxpayers get screwed more and more. (Most of us XM listeners pay taxes and get garbage and porn disguised as art) FCC regulations already prevent me from receiving broadcast TV because of where I live, so please don't stifle the progress of technology that makes peoples lives better because some people don't want to lose their free milk cow.

Thanks for listening.
